April 2, 2020

Dear Customer,

The global outbreak of coronavirus is an unprecedented event, and like all responsible businesses, Killark has been monitoring the current situation closely and following the advice and requirements of the federal and local authorities. We have continued to adapt our business operations to the rapidly changing events around the world, and until now, our essential business operations in Fenton, MO have remained open, with a number of policies and procedures implemented to ensure the safety of our employees.

However, in response to increased virus related concerns, Killark has decided suspend manufacturing at our Fenton, MO site until at least April 17th 2020, with immediate effect. This has been an incredibly difficult decision for us to make, but one made easier knowing it to be correct, as every day we watch the human cost of not acting decisively.

As has been the case in other industries, there will be inevitable delays during this time. Serving our customer remains a primary concern, and while we will continue to work to mitigate these delays, we expect delivery of orders to be delayed by at least 2 weeks. We ask that you take appropriate measures to plan for such a delay, to minimize disruption.

We will continue to monitor the situation and provide updates to our customers and others. Please note that Killark will continue to provide On-Line Chat and Technical support and quotations, and accept, load and schedule orders during this time, during our normal office hours: Monday to Thursday 7:00AM to 6:00PM CMT. We encourage you to contact your Customer Service team if you have any questions. Please see an updated contact list, attached, for Technical, price and delivery questions.

We thank you for your understanding. Our businesses have grown through our partnerships and relationships, our thoughts are with you and your families during this time.
