

## Coronavirus Update

Milbank Partners:

The parts and material suppliers for Milbank are primarily located in the US and are focused in the Midwest region. We source a few items internationally, mainly from India, Taiwan and China.

We are carefully monitoring the supply from China and have not encountered any disruptions at this time. We keep a buffer inventory at our plant and distribution centers in the US. Our suppliers are not anticipating any delays for our current orders. We are also monitoring the second tier where our US suppliers receive materials from other countries. The main source in these cases is from Taiwan and we do not foresee any issue with these supplies.

We will certainly continue to actively monitor and update the situation.
