

Updated 13 February 2020

To our valued customers:

Because we have manufacturing facilities in China, Panduit continues to closely monitor the circumstances related to the Coronavirus outbreak and the Chinese government's response to contain it, including the extension of the country's national New Year holiday. Our China operations were given clearance to resume operations on 10 February 2020.

To date, there has been limited impact to our orders, and we have taken the following steps to ensure continuity of supply:

- We have increased capacity in our other global facilities to sustain supply levels of impacted products.
- We continue to work with our suppliers to secure priority on deliveries of raw materials.
- We continue to monitor shipments through customs and ports to facilitate and expedite product availability.
- We have updated dates on customer orders in our system, and will continue to do so as new information becomes known.

Panduit will continue to monitor the situation and consider further action, as the Chinese government works to resume normal economic conditions. We will continue to notify our customers of updates related to impacts on our supply chain.
